Wash with plenty of soap and water ; followed by a warm water rinse . Apply a topical antiseptic agent to open wounds or broken skin . Remove contaminated clothing and shoes . Launder soiled , contaminated clothing before reuse . If skin irritation or rash persists , seek medical attention (P332+P313) .

After Eye Contact : May cause serious eye irritation after prolonged exposure .Rinse cautiously with warm running water for 15 minutes , lifting upper and lower lids occasionally . If easy to do, remove contact lenses .Continue water rinsing . (P 305+P351+P338 If eye irritation persists such as blinking , redness , or pain , seek medical attention . (P337 + P313) .

After Ingestion : May be harmful if swallowed . Do Not Induce vomiting unless advised by a physician or poison control center . If patient is fully conscious , continue to rinse mouth with water and drink 2-3 glasses of water .If adverse conditions persist , seek medical attention . Never give anything by mouth if victim is unconscious, rapidly losing consciousness , or is convulsing .Call a Poison Control Center / Doctor / Physician, if necessary (P312) .

After Inhalation : May be irritating to respiratory system if inhaled as a mist .Move to fresh air . Keep individual at rest in a position comfortable for breathing .If not breathing, give artificial respiration . If breathing is difficult, administer oxygen and seek medical attention (P261) .

Note to Physicians (Both acute and delayed symptoms) : Breathing difficulty, coughing , cramp, nausea, acidosis, disorientation . Extreme caution regarding gastric perforation ; pulmonary edema ; impaired breathing ; & disturbed cardiac rhythm . Potential symptoms of poisoning may occur after several hours of exposure . It is advised that at least 48 hour medical observation take place after the incident , especially for pneumonia and pulmonary edema . In case of irritation to lungs, initially treat with cortical steroid inhalants .
